Plastic injection molding business for sale located in Montreal

– Price \$900,000

For many years this custom injection molding company has been providing superior products and a high value added input to the development of new products for its many customers.

The 17,000 sq. ft. manufacturing facility is located in Montreal and has in operation a range of injection molding machines up to 700 tons.

The company has grown steadily since its inception and now enjoys sales of over \$1 million per annum servicing a diverse range of customers located almost exclusively in Quebec.

Although the strength of the company lies in injection molding, it is also able to offer sub-assembly, new product development services and mold testing & qualifying, providing customers with a broad range of services for a “one stop shop” experience.

Having developed the business from a standing start to its current level, the owners recognize that to further build the business additional resources, both financial and operational, will be required. The owners are therefore looking for the right strategic purchaser to provide these resources and are willing to remain with the company or exit the business depending on the strategic purchasers requirements.

Key data:

Sales: +\$1 million per annum and positive EBITDA/cash flow

Manufacturing facility: 17,000 sq. ft. lease until April 2011

Injection molding machinery up to 700 tons

Numbers of employees: 10 to 15 (including owners)
